Good Disease and Pest Resistance

Rescue 911 hard fescue (*Festuca brevipila*) is recommended for use on home lawns, parks, and golf course roughs. It is an exceptional choice for low maintenance areas and can be left unmown for its ornamental qualities.

Excellent Turf Quality: **Rescue 911** has very fine leaf texture and out of 26 hard fescue entries in the 2002 Final NTEP Report, **Rescue 911** was ranked #1 for genetic color when averaged over 34 trial locations.

Shade Tolerance: With the ability to retain good turf quality in shade, **Rescue 911** makes a great choice for those shaded areas where other grasses fade out.

Turf Density: Superb summer density and excellent fall density

Disease and Pest Resistance: Over several trials and different locations, **Rescue 911** has been proven its ability to maintain healthy turf earning:

- #1 Ranking for dollar spot ratings at North Carolina (under low input conditions)
- Tied #1 red thread resistance in Blacksburg, VA
- Tied #1 red thread/pink patch resistance in College Park, PA
- #4 brown patch resistance at North Carolina (under low input conditions)
- #6 overall leaf spot resistance
- Very good typhula blight (grey snow mold) resistance

Seeding Rate:

Maintained at turf heights: 4-6 lb/1,000 ft² (20-30 g/m²)

Unmown areas: 20-40 lb/acre (25-45 kgs/ha)

Overseeding into existing turf: 6-10 lb/1,000 ft² (30-50 g/m²)
