Temple was developed and selected for best performance turf and high seed yields. Temple has a dwarf growth habit and was highly rated in the NTEP Schedule B (Low Maintenance) trial. It also received a high NTEP performance rating in Table 4, Schedule A maintenance. This variety provides superior density throughout the growing season in all parts of the US due to its aggressive tillering ability which also helps repair damaged areas of turf.

Temple produces an attractive turf with good genetic color, density, great Brown Patch and Net Blotch disease resistance. These characteristics makes Temple great for many applications like home lawns, parks, sod production, sports fields and commercial properties. Temple is also compatible with other cool-season turfgrasses.

If you are looking for a Turf Type Tall Fescue that has a dwarf growth habit Temple is the Tall Fescue for you.

Benefits

- Good Color
- Drought Tolerant
- Aggressive Tilling 
- Dense
- Brown Patch and Net Blotch disease resistance
- Dwarf growth habit
- Does Great in Low Maintenance Situations

Seeding Rates

New Establishment:	8-10 lbs/1,000 square feet
Overseeding:	4-5 lbs/1,000 square feet
